

ThumbStack Technologies Assignment

1) Figma: “Nisha Recommends” section should be visible.

Live site: Section missing

In the Stackables ([Stackables](#)) Web UI home page the items should show like the following screenshot As it is maintained in the Figma

But showing like this screenshot: Nisha Recommends is not present

2) Figma : highlights Best Sellers with handpieces.

Live site: highlighted with handpieces .

In the home page The Best Sellers should be highlighted as mentioned in the Figma.

But not present: Highlighted with Handpieces in the Stackables home page

3) In the home page all type of products should be present

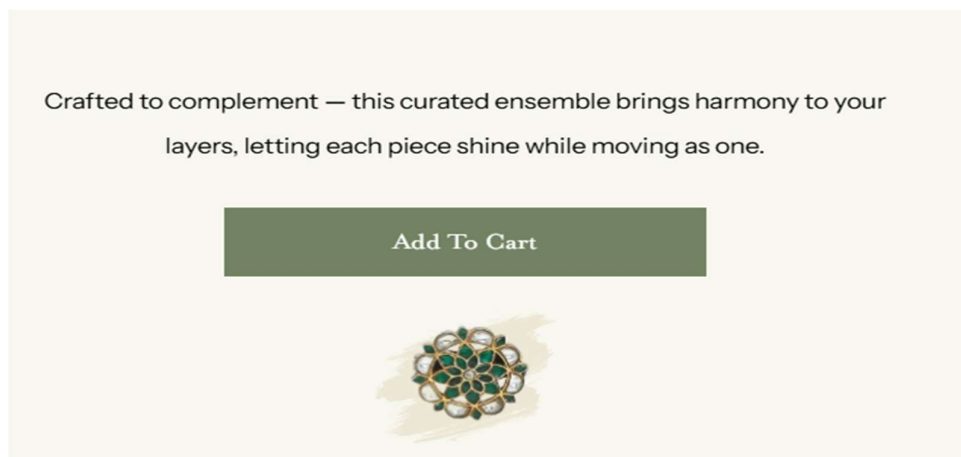

But just two types of products are present in the home page

4)in the Figma home page shop now button is present

But in Stackables home page add to cart is present

5) In the navigation Figma in the shop by style (Bangles, Cuffs, Kadhas) are present

But in Stackables navigation (Bangles, Cuffs, Bracelet) are present

6)in the navigation there is a difference between Figma and Stackables in the gift collection

*Price is low in the Figma but not in Stackables navigation

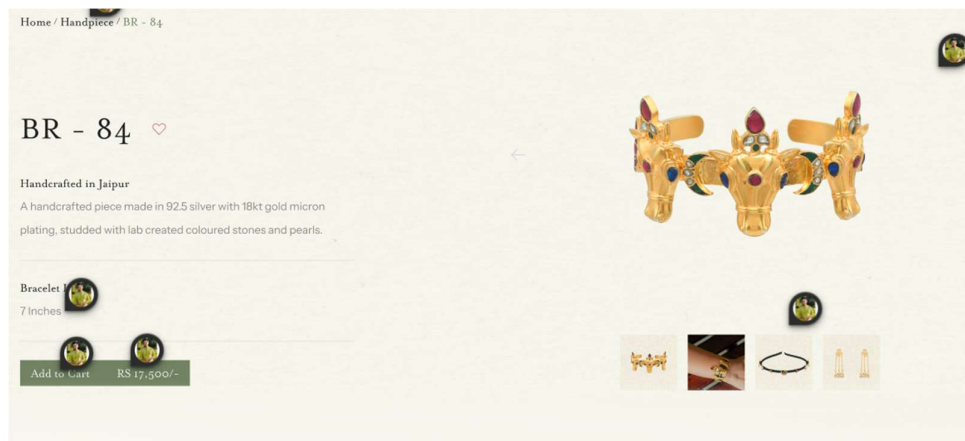

*Price is not comma separated but separated in Stackables navigation

7)in the navigation Nisha Recommends and Build your Stack is not present in the Figma but present in the Stackables navigation

8)In the product details tab for BR84 this ring is present

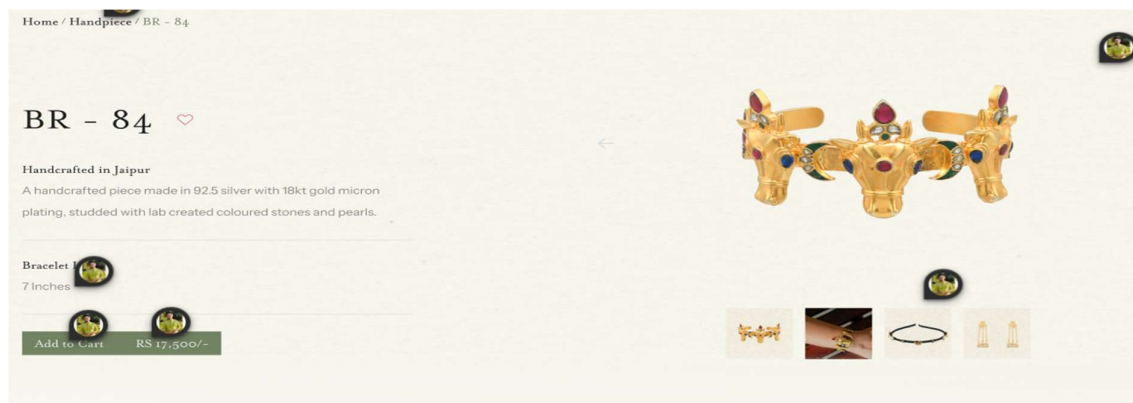

But in stackables for BR84 different ring is present

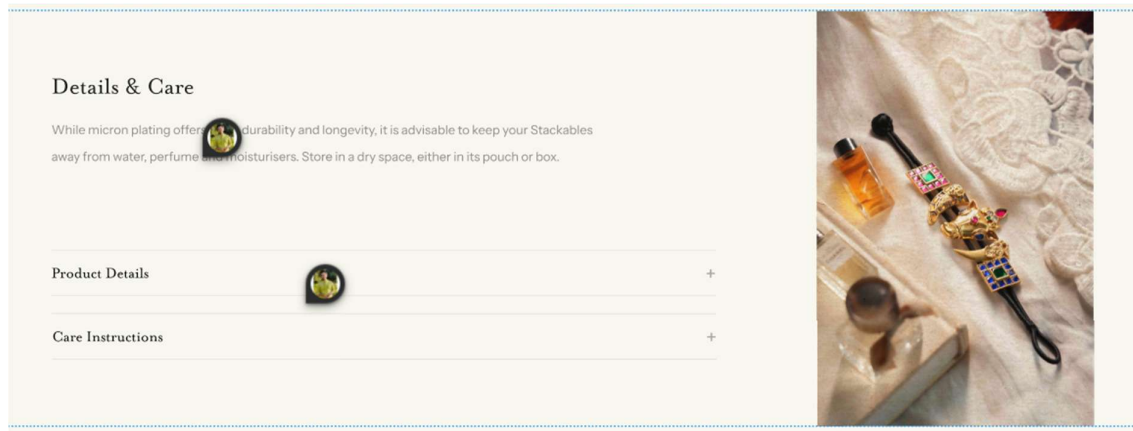

9) In the product details in the Figma price is 17,000

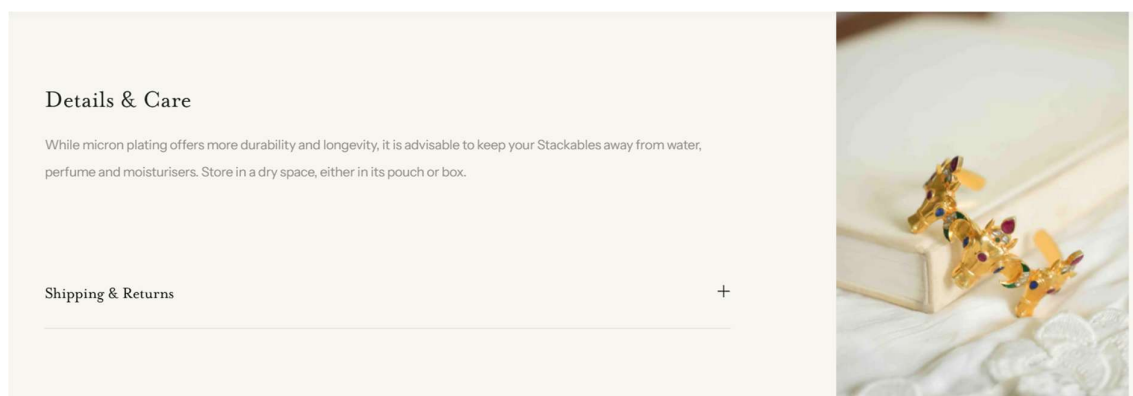

But in stckables it is 17,500 also have different names and manufacturing information mistake

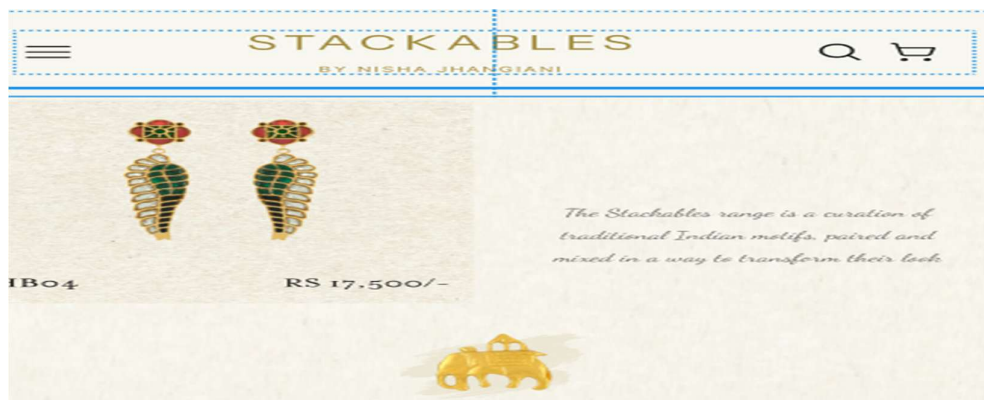

10) in the product details care instruction tab is there

Which is not present in the stackables product details

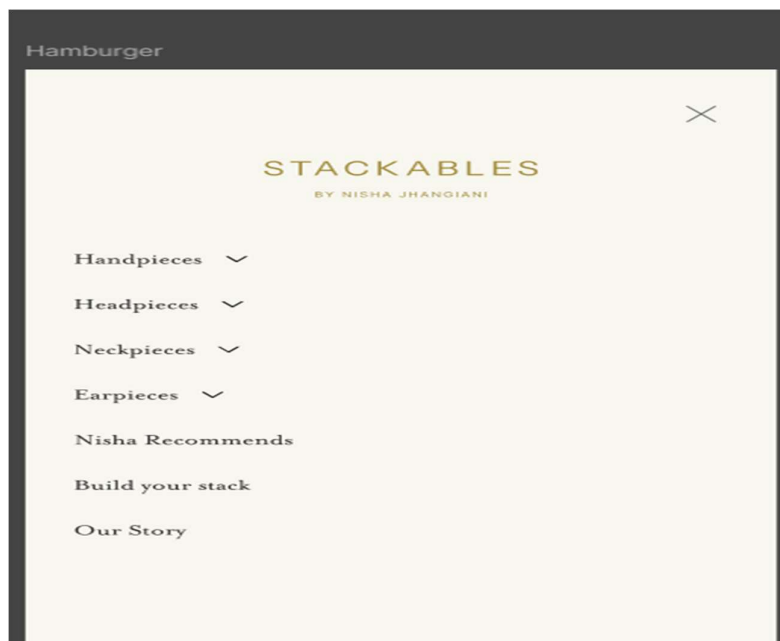

11) In the **mobile UI** in the home page the basket is present for cart

But not in stackables mobile view

12) In the **mobile UI** in the home page Hamburger options are different

****Functional Testing Notes**

- **Navigation:** Extra items (“Nisha Recommends”, “Build Your Stack”) not in Figma.
- **Forms:** Both *Contact Us* and *Stay in Touch* forms allow invalid data without showing error messages.
- **Checkout Flow:** Price discrepancy between product and checkout (₹17,000 vs ₹17,500).

**** Accessibility & Usability Issues**

1. **No error messages on invalid input fields** (Contact Us, Stay in Touch) → poor accessibility for users with screen readers.
2. **Low color contrast** on banner text → harder to read on smaller devices.
3. **Keyboard navigation** – Tab focus not clearly visible on buttons (usability issue).

BUGS

Bug number1: handpieces and headpieces names are interchange

Summary: handpieces and headpieces names are interchange based on logos

Steps to reproduce: land on the home page → scroll down to the products → change the names accordingly

Expected: logo with proper names

Actual: logo is not matching with the names

Priority: Low

Screenshot:

**** Final Suggestions: if I am a test lead then I will push this things**

- **Top 3 Fixes to push immediately:**

1. Fix Contact Us & Stay in Touch form validation (Critical).
2. Resolve product mismatch issues (BR84 design, price, care instructions).
3. Ensure homepage matches Figma design (Nisha Recommends, build your stack should be included).

- **Areas for Automation:**

1. **Form Validation Testing** → Automate invalid input scenarios (Contact Us, Stay in Touch, Checkout).
2. **Regression Testing for Navigation & Product Prices** → Ensure menu items and prices stay consistent after updates.
